**The burden of incontinence compared to other chronic diseases**

- Continence care & cure - a medical perspective
- The cost of inaction
- The consequences of inadequate continence care
- The state of the nation on continence care services
- A review of current continence care provision
- Person-centered care in residential care environment
- Today’s guidance on management for containment in clinical guidelines
- The importance of performance/outcome measurement. A quality framework for continence care services: key principles and performance measures

**Ageing societies and long term care**

- Incontinence as a health and social policy priority
  Special address
- Focus from disease to functional capabilities, investing in health, investing in continence care
- The voice of patients and carers
- Panel interview with patients & carers
- Enabling technologies helping improved continence care

**Panel discussion** Policy levers for making change happen / incentives for better integrated care

- What policies / innovative approaches are needed to adapt to an ageing population and burden of incontinence?

**Panel discussion** Barriers to adopting and stimulating innovation

- Elevating pockets of best practice into policy/policies
- What is needed for change?

**Panel discussion** How do we finance future continence care?

- What funding opportunities exist?
- What are the issues and barriers to adopting new funding opportunities and models?
- What is needed for change?

**Country breakout sessions**

**Feedback country break-out sessions**

**Panel discussion** Policy levers for making change happen / incentives for better integrated care

**Panel discussion** Barriers to adopting and stimulating innovation

**Panel discussion** How do we finance future continence care?
